- 🦀 Assisted customers in all areas of the sales floor; multitasking skills developed.
- 🦀 Maintained the store in accordance with high organization standards.
- 🦀 Detail-oriented studies of products allowed for customer-specific sales.

RELEVANT PROJECTS

Personal Portfolio

- Constructed and designed a portfolio website showcasing photography and web design projects. Coded by hand, the site uses PHP to change layouts that are written in CSS. All logos and buttons are designed by me.

Centrient Beings

- Designed and built a website for a community of half-zombies based on a personal work of fiction using PHP, HTML, and CSS. Created original logos and iconic imagery.

Michael Urie's Blog

- Revised the website design for actor Michael Urie and supplemented the site with photo and video content.

Bibbentuckers

- Diagnosed problems within the site template and implemented corrections to allow for more dynamic templates and cross-browser compatibility.

Championship

- Produced and assembled a website for an auto accessory. Integrated Flash and video elements. Part of a class assignment.

Keith Livingston Design

- Implementing and updating products for an artist's e-commerce site.

Suzie Bitner Was Afraid of the Drain

- Composed a website for an author and illustrator using images provided by the client. Produced a blog using WordPress.

Steven Graves Insurance

- Designed and built landing pages for a local insurance company. Utilized Google Analytics, keywords, and other tools for improved search engine rankings.

Holland Marble

- Revised content and images within Business Catalyst for a local residential and commercial stone company.

Healing Wheels

- Planned and developed a website for a cycling charity. Constructed a logo for both a cyclist's jersey and the website. Proposed various layouts and text to suit the customer's needs.
